To: privacy@fortinet.com

Hello,

Under the California Consumer Privacy Act, and in particular under California Government Code, sec. 1798.110(a)(5), I hereby request all log data that is currently stored for the user "Amy Parker" as has logged in to the Cerritos Community College District ("Cerritos College") network (access point "Cerritos Guest AP"). To further narrow the results, if necessary, this user logged in under the email address apark0006@student.cerritos.edu (which I am currently emailing you from, as I am Amy), and used the devices going by hostnames "Amy-s-S22-Ultra" and "kiyoko". I request all of the logs that are currently stored. As a California resident, I am able to receive these records. Fortinet is subject to the CCPA as it has yearly gross revenues in excess of \$25 million.

Please provide the records as soon as possible. Thank you.

Hello,

We are in receipt of the below notice relating to your data subject request. In order to assist you, please provide details regarding your relationship with Fortinet. For example, what products/services do you use, if any, and what kind of communications have you received from Fortinet?

Feel free to reach out if you have any questions. Thank you.

Regards,

Angie Jin

Hi Amy,

Thank you for your messages. We have checked internally and our understanding is that Cerritos College uses Fortinet products that do not involve Fortinet storing logs on their behalf. If you have any further questions regarding how your personal data is processed through Cerritos College's network, we recommend you follow up with them. Please let me know if you have any questions or require anything further.

Thanks,

I can confirm that this is not correct. The college has disclosed to me that it ships its logs off to its security vendor - which in this case is Fortinet - who stores them, and then uses them to generate their reports.

Please check in on this; my CCPA request is still standing.

Hi Amy,

We have checked again, and confirm that we do not have your personal information stored within our systems through the Fortinet solutions utilized by Cerritos College. We suggest that you contact Cerritos College for further clarification on this point. We are happy to assist however we can. Please let us know if you have any other questions or require anything else. Thank you.

Regards,

Angie Jin

Do you have any comments on this? I thought that the college sent student records outside to Fortinet, the college's "security provider". Is the provider someone else?
