Good morning,

In the search for responsive records to your request, The Department of Recreation and Parks (Department) has no responsive records to your request. We greatly appreciate your courtesy and patience in this matter. Thank you.

That is not a valid reason for applying the fourteen day extension. The reasons an extension can be applied are to be narrowly construed, and are explicitly listed in GOV 7922.535(c):

- (1) The need to search for and collect the requested records from field facilities or other establishments that are separate from the office processing the request.

- (2) The need to search for, collect, and appropriately examine a voluminous amount of separate and distinct records that are demanded in a single request.

- (3) The need for consultation, which shall be conducted with all practicable speed, with another agency having substantial interest in the determination of the request or among two or more components of the agency having substantial subject matter interest therein.

- (4) The need to compile data, to write programming language or a computer program, or to construct a computer report to extract data.

If one of these reasons is applicable, then that's fine; but simply claiming that you didn't get to handle it until after the 10-day window is not permitted by GOV 7922.535(b-c).

Good afternoon,

Unfortunately the request was received by our office as the 10 day period was expiring, thus we've exercised the need to extend the request. Thank you.

Generally, RAP has ten (10) calendar days to respond to a request for records. The response need only state which responsive documents will be made available, and which records, if any, will not be produced, citing specific exemptions. In unusual circumstances, the time limit to respond to CPRA requests may be extended, by written notice, up to fourteen days.

Hello,

The fourteen day extension is fine, as long as you can specify which of the explicitly listed in statues reasons for the extension (need to write a program, need to fetch records across field offices, need to process voluminous amounts of records, etc).
